Expert 2 (80%)	0	1
Expert 3 (70%)	0	1
Expert 4 (60%)	1	1

DeepSeek-R1 explanation

The participant employed a two-step decision-making strategy. First, they determined which product had the majority of positive ratings (1s) across all experts. If the products were tied in the number of positive ratings, the participant then considered the rating from the highest validity expert to break the tie.

Product A	Product B	Response
1 0 0 1	0 1 1 1	A
0 1 1 0	1 0 0 0	B
1 0 0 0	0 1 1 0	A
0 1 1 1	1 0 0 1	B
1 0 0 1	0 1 1 1	A
0 1 1 0	1 0 0 0	B
